Subject: Swinomish website development costs

Larry was going to speak with Strategies360 this morning regarding the website development costs- so hopefully I will get that information today?

Changing channels, Larry in regards to the acknowledgement of EPA funding t&c for a radio spot, he indicated that the text string would be longer than the ad itself, so he asked whether there was any flexibility on the t&c. I told him there was not, but I told him I would pass along the question, because he wanted me to do so. All I need is your confirmation of my understanding.

Dietrich
